

# 3D Grid Abstract self portrait

Terrell gayle

## Artist statement-mission

For this project I will be doing a 3d self portrait that shows what I like doing on my free time cause I grew up on playing these old gen consoles cause it was passed down from my father to my older brother down to me. I have a lot of experience with gaming cause every day I used to wake up and spend hours playing. This project 3d self portrait can also be an example of some ordering principles for architecture. The ordering principles that are in my portrait shows hierarchy because it has a form or space by its size, shape, or placement relative to the other forms and spaces of the organisation.” It also shows a little bit of proportions cause it refers to the size of the parts of an object in relationship to other parts of the same object.

# Model making process

# Inspirational images

I don't have any artist I'm referencing from my design outcome. But I found pictures that are kinda like my portrait, and the Sol LeWitt picture looks like the Nintendo logo

This Sol LeWitt picture looks like the Nintendo logo

I dont really got a ps5 i just wanted to add it there for the  
project

## A collection of vintage video game consoles and controllers, including a Super Nintendo Entertainment System (SNES), a Sega Saturn, and a Sega Dreamcast, along with various game cartridges and controllers, arranged on a textured surface.

## Artist Statement

It took a lot of time to get started on this 3 dimensional self portrait project. I eventually figured out what I was going to use for the project because before I didn't know what to do or use. Since I had a collection of gaming consoles that I documented, I decided that they would represent me since I love gaming. Each console represents a different timeline of me playing with these. I arranged these consoles to show the Ordering Principles of hierarchy and a little bit of scale and proportions, which would also represent the levels of gaming and growing with experience in the game and the game of life.
